

PFF60-1420

DESCRIPTION

UPPER ENGINE MOUNT INSERT

INSTALLATION GUIDE

Contents (parts per pack):

1 x Polyurethane Bush 1 x Cable-tie

Please read the complete fitting instructions and check package components before fitment. These fitting instructions are to be used as a guide and in conjunction with workshop manual. It is recommended that:

- -all work to be carried out by a licensed technician;
- -all safety precautions adhered to;
- -wheel alignment to be checked and adjusted as required after any suspension work.
- -All fasteners must be tensioned to manufacturer's torque settings.

Fitting Instructions:

- 1. Unbolt and lift the coolant reservoir to expose the end of the engine mount. <u>DO NOT</u> attempt if the engine coolant is hot.
- 2. To install this part the engine mount must be removed from the car.
- 3. Open the insert and wrap it around the rubber. Applying some washing up liquid may help the insert feed through.
- 4. Secure the supplied cable tie around the insert ensuring it sits in the moulded groove. Trim off the excess tail of cable tie.
- 5. Re-fit the coolant reservoir in place.
- 6. Tighten any loosened fasteners to manufacturer's torque settings.
